RESERVE BANKS SHOW GAIN.

Federal Board Describes Business of Week in Statement.

The Federal Reserve Board, in its weekly statement yesterday, says its banking system last week showed a gain of more than \$2,000,000 in the cash resources, and of almost \$4,000,000 in the gold resources of the banks over that of

the week before. Loans and discounts increased during the week more than \$2,500,000. Nearly 50 per cent of the paper held by the banks matures within thirty days and 82.5 per cent within sixty days. Investments in public securities are reported by six banks. By far the larger part of the securities bought are municipal and State warrants maturing within six months. Deposits show a gain of nearly \$10,000,000. New York and Boston reporting the largest increases for the week. The amount of Federal reserve notes in circulation was \$17,877,000, which is slightly larger than the amount reported the week before. The net liability of the reserve banks on account of their outstanding notes shows, however, a decrease of about \$20,000 because of the larger amounts of gold held by the agents for the retirement of these notes.

The biggest furniture opportunity in years is right here. Hardly a piece of furniture in this big stock of ours was damaged or in any way marred by the recent fire which occurred to us. There is nothing that a little furniture polish won't remove. Yet we are making sacrifice prices on the entire stock. You can buy brand-new, perfect furniture at just about the prices that second-hand store would charge you. Although we cannot begin to enumerate the many wonderful bargains we are offering on every piece of merchandise in the store—still a few figures below hint how ruthlessly goods are being sacrificed. This is a BIG opportunity—don't miss it.
